

7.1.2 The Institution has facilities for alternate sources of energy and energy conservation measures

The college has implemented the use of solar panels as an alternative energy source, which effectively contributes to a portion of its energy usage. LED bulbs have been adopted as a replacement for tube lights, resulting in energy conservation. In addition, our institution possesses adequately ventilated classrooms, resulting in reduced reliance on artificial lighting and fans during the winter season. The infrastructure enables the potential for energy conservation.

1. Solar energy
2. Use of LED bulbs

Solar panel System "Billing Materials for PV System"

AUTOMATION & ENGINEERING SERVICES

Billing materials for PV System

Particulars	Description	
PV Module Topsun/Raaj Ratna or Equivalent	Model No : 330 Wp	Quantities
On Grid Inverter INVT	Model No :	As per billing table
PV Mounting Structure	*Standard Structure	
B.O.S-Balance of System	DC/AC cables, Fuses, Switches, DC Combiner box, Electrical accessories, PVC conduits pipes, Clamps, Cable ties and Insulations.	
Installation	Included	

Note: Captive Power generation is not a backup power. If Utility Power Fail System will stop producing Solar Power for safety Purpose (International Standards).

*Extra Fabrication cost will be borne by Customer if needed.
